Dear Robert,

Thank you so much for meeting with us, it was really interesting to talk and learn from you. We found the graves you mentioned which was a very touching moment for us.

We have seen and toured some of the mines in the area, which together with all you mentioned is painting a much better picture of the period.

We were so happy to receive your information and I am looking forward to reading it once I get back home. It will help me understand better how my great grandparents lived and worked here so many years ago.

Thank you again for your time and knowledge,

Janet and Bob Barclay
